What we offer

SYNLAB provides a multidisciplinary approach for fast, high-quality, efficient and accurate diagnostics:

Human medicine ¹
We provide complete medical diagnostic services to laboratories, healthcare professionals hospitals and patients. We attach great importance to the advancement of medical diagnostics and are a driving force of medical progress by pursuing growth and innovation.

Environmental analysis ¹
We support the environmental consulting, compliance and assurance community by providing a wide range of reliable testing using our accredited in-house and standards compliant methods to support your analysis needs in a broad range of matrices. Our service includes logistical and integrated IT (online ordering and data management) solutions, compliance tools and sophisticated tech support.

Veterinary medicine ¹
We offer a comprehensive range of tests as well as diagnostic advice for companion animals, horses, reptiles, birds, as well as farm animals and exotic species. Our clients are mainly veterinarians, though we also offer services to universities, zoos, pharmaceutical laboratories, the food industry and other animal health professionals.

Pharma-Industry ¹
We offer a broad range of laboratory services to the biotechnology, pharmaceutical and cosmetic industries as well as to manufacturers of medical devices, novel foods and crop protecting agents. We offer a dedicated expert testing service for the whole lifecycle from drug development through clinical trials to drug safety and response.

Food ¹
We are your partner in all food & feed issues. With our strong laboratory network, we are able to work regionally and internationally, for you. State-of-the-art technology also allows us to provide a wide range of analytical methods for a broad range of products.

Products ¹
We carry out Oil Condition Monitoring on samples from clients around the world reporting in more than 20 languages. We analyse engine oils, fuels, coolants and transformer oils, ensuring customers maximise the return on their investment. We are experts in liquid, solid and secondary fuels analysis and monitoring combustion processes. Through our accredited training centre we also provide approved qualifications to our customers.

Hygiene ¹
We are a full-service provider for hygiene diagnosis: sampling, analysis, validation, monitoring and counselling. We perform all kinds of microbiological, physical and chemical tests according to European standards and ensure fast, punctual and reliable service.

Full range of diagnostic services

CLINICAL DIAGNOSTICS ALONG THE ENTIRE VALUE CHAIN

SYNLAB collects your blood sample, delivers it fast and safely to one of our regional labs or centers of excellence, analyzes the sample, provides differential diagnosis and interprets the results in our network of medical experts.
Our patients are at the centre of our work

In everything we do, our focus is on delivering the best possible services for our patients. We aim at delivering top quality services for state-of-the-art medical diagnostics and be the partner of choice for health professionals and patients across Europe and beyond.

Benefits for our customers:
- Best-in-class processes
- High quality and low costs
- One-stop shop
- Personal counselling
- Security and expertise
- Breadth and depth of diagnostics
- Medical innovation based on our access to and collaboration with universities and research

Focusing on our patients' health

We offer a seamlessly integrated approach, covering all stages of the disease, to best serve our patients.

1. Predispositions
   - Possible phenotypic development
   - Genetic predisposition for a disease

2. Primary Prevention
   - Avoiding disease
   - Preventing infections

3. Secondary Prevention
   - Avoiding unnecessary treatment and care
   - Improving patient care and effective management

4. Treatment Control
   - Limiting the relapse risk
   - Improved clinical management
Innovative solutions

1. New diagnostic tests and technologies
SYNLAB is the preferred partner for the public and private sector when it comes to entering new markets and developing innovative diagnostics. Our close collaboration with research departments from universities and the pharmaceutical industry enables us to make new tests available to the medical community early.

Focus areas of our research are genomics, women’s health, cardiology, nutrigenomics and others. At the same time, we constantly develop and improve IT solutions and services to make our diagnostic tests more easily accessible for our customers.

2. Companion diagnostics – personalized medicine
The effectiveness of a drug highly depends on genetic variations of patients. As therapies are entering ever more sophisticated stages, they at the same time become more individual. A rapidly growing field within this so called personalized medicine is companion diagnostics.

Companion diagnostics is the diagnostics developed alongside the drug development. This diagnostics enables doctors to make better decisions regarding effectiveness and dosing of drugs.

Synlab has entered this area of diagnostics to always provide doctors with the latest and most innovative service offering.

For hospitals, dialysis centers, polyclinics, outpatient clinics, laboratories and others, we offer different models of integrated diagnostic solutions:

- Point of Care (PoC)
- Management and Supply
- Outsourcing
- Joint Ventures
- Consulting

Outsourcing of single analysis

- Time-critical routine analysis on-site incl. PoC
- Other routine and special analytics performed by SYNLAB

Complete outsourcing of analysis

- Time-critical routine analysis on-site incl. PoC
- Laboratory managed and supplied by SYNLAB

SYNLAB runs customer lab

- Laboratory on-site incl. PoC
